Betsy...in response to your comments/questions: some of the comments have been addressed already since you commented on an older draft. Also, I added the anticipated dates to help all the management reviewers be aware of when something is likely to change categories since EIs are GPRA measures. The anticipated dates will not be viewable to the public. I think there are a couple of sites where we can sharpen our pencils and move the dates, but believe this does not have to be done today.

FOR the HEID paragraphs, the anticipated date is when we estimate we will know enough to move the site to EITHER Under Control OR Not Under Control Status. So for 700 South, for example, the RPMs anticipate knowing enough by 9/30/2018 to move the site to HEUC or HENC.

I'm attaching your comments with my responses and also a clean, updated version of the paragraphs.

The HENC comments will be coming your way soon as well.

Fran
